

ABOUT ME

An attentive and passionate Java/Kotlin back-end Software Engineer from Turkey with 3 years of professional work experience. I'm mainly focused on developing cloud serverless, highly scalable, containerized back-end applications with Spring, Micronaut, Quarkus and VertX technologies.

Moreover, I have developing experience in cloud with AWS and databases with DynamoDB, MariaDB, MySQL and SQLite.

During my professional experience, I contributed in development of websites, Android applications which are used by millions and in multi-national distributed projects.

I'm passionate about learning new technologies, helping and sharing my knowledge with my team. Furthermore, I'm developing open-source projects in my free times.

WORK EXPERIENCES

iConec Wave (Istanbul/Fully Remote)

Feb 2022 – Present | Software Engineer

(Java/Kotlin/Spring/AWS)

Kod Gemisi (Turkey/Fully Remote)

Oct 2021 – Jan 2022 | Intern

(Kotlin/MicronAut/Hexagonal Architecture)

General Mobile Inc. (Istanbul/In Office)

Nov 2017 – Aug 2018 | Android Developer

(Kotlin/Java/Android/MVVM/MVC/MVP)

PROJECTS

iConec Wave - Royal Canin

AWS, Spring, Java, Serverless, PostgreSQL, DynamoDB, S3

Royal Canin is a famous French cat & dog food producer. I'm contributing to development of web services solutions for distribution, veterinary clinic and customer order managements in US, France and Japan continents.

iConec Wave - DxPathFinder

AWS, Java, Serverless, DynamoDB

DxPathFinder is an online digital performance cockpit. I provide web service solutions for project needs also with helping improving business calculations.

Kod Gemisi - Grispi >> <https://grispi.com>

Kotlin, Java, Micronaut, Hibernate, Docker, PostgreSQL, Hexagonal Architecture

Grispi is a CRM application like Zendesk. I improved and added new scenario tests, optimized code base, and developed web services for groups and tickets in application.

General Mobile - Android Applications

Kotlin, Java, Dagger, Retrofit, Picasso, MVVM, MVP, MVC

I developed Android applications which are still available and were used by millions in Google Play. The applications I contributed in development of new futures and bug fixes were GM Gallery GO, GM Music, GM File Manager, GM Voice Recorder and GM Assistant.

Portfolio >> <https://duruer.dev>

Since 2020 | SvelteKit, Netlify, Bootstrap 4

My small open-source serverless portfolio website which I have created to introduce myself. It supports both Turkish and English languages. I built with SvelteKit, Netlify, Bootstrap 4 and SvelteKit.

Routve

2020 | Svelte

An open-source advanced Svelte 3 router library which is based on Page.js library, which supports dynamic and static component import.

Pano

Since 2018 | SvelteKit, SASS, Kotlin, MariaDB, Vert.x

An open-source advanced gaming CMS for Minecraft community server website needs. It supports themes, addons and more features. I built with Kotlin, SvelteKit and previously Vue.

Antik K p

2015 - 2019 | Kotlin, MySQL, SQLite, Vert.x

A Minecraft MMORPG game. We have created an unique game in Minecraft for players.

EDUCATION

University Of P cs - Hungary

Sep 2019 – Jul 2022 | Computer Science (BSc)

LANGUAGES

English

Professional Proficiency

Turkish

Native

CERTIFICATES

EFSET B2 Level English

Jul 2019 | www.efset.org/cert/CPTFNg

SKILLS

Kotlin

High Level

Vert.x Back-end OOP Android Web Server

Java

High Level

Spring Micronaut Hibernate Lombok
MapStruct AWS SDK

Javascript

High Level

Vue.js Svelte 3 ReactJS SvelteKit REST API

Database

Middle Level

MySQL SQLite MariaDB MongoDB MSSQL
DynamoDB PostgreSQL

Linux

High Level

Arch Linux Linux Mint Debian Server DevOps
Docker

HOBBIES

Table Tennis Swimming Cycling Billiard
Research & Development
