

ABOUT ME

An attentive, open-minded and passionate Java/Kotlin full-stack Software Engineer with 4+ years of professional work experience. Mainly focused on developing cloud serverless, highly scalable, containerized applications with Spring, Micronaut, Quarkus, SvelteKit and VertX technologies.

Experienced in cloud with AWS and databases with DynamoDB, MariaDB, PostgreSQL and MySQL. Also experienced in front-end with React, Vue and SvelteKit. (not developing CSS)

During the professional experience, contributed to development of back-end and front-end applications, which are used by millions and in multi-national distributed projects. (Previously had experience in developing Android applications)

I'm passionate about solving real world problems, learning new technologies, eager to collaborate with my team.

As a personal development, I'm developing & contributing open-source projects in my free times.

WORK EXPERIENCES

iConec Wave (Istanbul/Fully Remote)

Feb 2022 – Present | Full-Stack Software Engineer

(Java/Kotlin/Spring/AWS/React)

Kod Gemisi (Turkey/Fully Remote)

Oct 2021 – Jan 2022 | Intern

(Kotlin/MicronAut/Hexagonal Architecture)

Statu (Turkey/Fully Remote)

Jan 2020 – Sep 2021 | Back-End Developer (contract)

(Kotlin/Vert.X/Docker/ClickHouse)

General Mobile Inc. (Istanbul/In Office)

Nov 2017 – Aug 2018 | Junior Android Developer

(Kotlin/Java/Android/MVVM/MVC/MVP)

EDUCATION

University Of Pécs - Hungary

Computer Science (BSc)

PROJECTS

Parsek >> parsek.dev | Since Dec 2023

Kotlin, Clickhouse

An open-source modular back-end written in Kotlin.

Rule AI | Dec 2023 - Oct 2024

Coolify, Parsek, Kotlin, Clickhouse, Linear, RabbitMQ, OpenAI

An AI platform for content generation and enhancement for e-commerce product owners.

iConec Wave - Royal Canin

AWS, Spring, Java, Serverless, PostgreSQL, DynamoDB, S3

Royal Canin is a famous French cat & dog food producer. I'm contributing in development of web services solutions for distribution, veterinary clinic and customer order managements in US, France and Japan countries.

iConec Wave - DxPathFinder

AWS, Java, Serverless, DynamoDB

DxPathFinder is an online digital performance cockpit. I provide web service solutions for project needs also with helping improving business calculations.

Kod Gemisi - Grispi >> <https://grispi.com>

Kotlin, Java, Micronaut, Hibernate, Docker, PostgreSQL, Hexagonal Architecture

Grispi is a CRM application like Zendesk. I improved and added new scenario tests, optimized code base, and developed web services for groups and tickets in application.

General Mobile - Android Applications

Kotlin, Java, Dagger, Retrofit, Picasso, MVVM, MVP, MVC

I developed Android applications which are still available and are used by millions in Google Play. The applications I contributed to development of new features and bug fixes were GM Gallery GO, GM Music, GM File Manager, GM Voice Recorder and GM Assistant.

Pano | 2018 - 2022

SvelteKit, SASS, Kotlin, MariaDB, Vert.x

An open-source advanced gaming CMS for Minecraft community server website needs. It supports themes, addons and more features. I built with Kotlin, SvelteKit and previously Vue.
